

I absolutely want the NJ Do Not Call program to continue as it is now in place. It is amazing how much less I am bothered by unwanted telemarketing & "Scam" calls like "special awards". Before the ruling was in place, I got so many bothersome calls, that I purchased an apparatus that hooks up to a phone that you record a message & hit a button when you receive an unwanted call. It had gotten to the point that I never answered my home phone, but waited for my answering service to take the call. I get enough junk mail advertising everything under the sun. I don't need more people trying to sell me services & things I don't want. If the telemarketers are upset - tough titties! We have a right not to be bothered day & night by unwanted phone solicitation.
